

MSG91 Pricing Evaluation Report for OTP-Based Login System

Prepared By: Software Development Team
Date: 22 July 2026
Purpose: Evaluation of MSG91 pricing for implementing OTP-based user authentication.

1. Objective

The objective of this report is to evaluate the pricing options offered by **MSG91** for implementing an OTP-based login system. This evaluation focuses on the available authentication services, pricing structure, and the recommended service for our application.

2. Services Evaluated

The following MSG91 services were reviewed:

Service	Purpose
OTP API	Send and verify One-Time Passwords (OTP) for user authentication.
SMS API	Transactional SMS delivery for OTP messages.
WhatsApp OTP	OTP delivery through WhatsApp Authentication.
OTP Widget	Ready-to-use hosted OTP authentication interface.

3. OTP API Pricing

The OTP API is the recommended service for applications requiring custom authentication flows.

OTP Volume	Price per OTP
------------	---------------

5,000	₹0.25
15,000	₹0.22
27,000	₹0.20
100,000+	₹0.19
850,000+	₹0.18

Estimated Monthly Cost

OTPs per Month	Estimated Cost
----------------	----------------

5,000	₹1,250
10,000	₹2,500
25,000	₹5,000
50,000	₹9,500
100,000	₹19,000
500,000	₹95,000
1,000,000	₹180,000

4. SMS Pricing

Transactional SMS pricing is volume-based.

Usage	Approximate Cost
Small Volume	₹0.20–₹0.25 per SMS
Medium Volume	₹0.18–₹0.20 per SMS

High Volume ₹0.16–₹0.18 per
SMS

5. WhatsApp OTP Pricing

WhatsApp OTP pricing follows Meta's Authentication Conversation pricing model.

Pricing depends on:

- User country
- Authentication conversation category
- Meta's applicable charges
- MSG91 platform charges (if applicable)

There is no fixed per-message price for WhatsApp OTP.

6. OTP Widget

The OTP Widget is a hosted authentication solution that provides:

- Pre-built OTP user interface
- OTP verification workflow
- Quick frontend integration
- Reduced implementation effort

Pricing depends on the selected plan and expected usage.

7. Recommendation

After reviewing the available services, the **MSG91 OTP API** is recommended for implementing our OTP-based login system.

Reasons

- Competitive pricing starting at approximately **₹0.18 per OTP** for higher usage volumes.

- Complete control over the authentication workflow and user interface.
 - Easy integration with backend technologies such as Java, Node.js, Python, .NET, and PHP.
 - Supports DLT-compliant transactional messaging in India.
 - Suitable for applications ranging from startups to enterprise-scale deployments.
-

8. Conclusion

MSG91 offers a scalable and cost-effective solution for OTP-based authentication. The OTP API provides the flexibility required for custom application development while maintaining competitive pricing and reliable message delivery.

Based on the pricing evaluation, the **MSG91 OTP API** is the recommended choice for implementing the application's OTP-based login functionality.
